## **247Headhunting Rolls Out State-of-the-Art Client Portal**

Cutting edge tool streamlines recruitment process, strengthens communications and delivers results that delight clients.

**Oakbrook, Illinois, February 14, 2013** – 247Headhunting, Inc., the pioneer in offshore Recruiting Process Outsourcing (RPO), announces the release of its innovative client/recruiter portal for its UK operations. The portal, named Client Path is another milestone in the continuing evolution of 247Headhunting’s market-leading services and recruiting platform. A USA version of Client Path is currently being developed.

Client Path efficiently automates the process of submitting potential candidates for each client’s open positions. Beginning with the client entering detailed information about each position, each request includes all necessary information for the offshore resourcer to start a search, and eliminates the need for back-and-forth emailing to get the full picture of the client’s needs. Copies of the request are automatically sent to everyone on the assigned resource team, so the client is assured that the work is scheduled and will receive attention.

With the request in hand, the 247Headhunting resourcer is now able to begin a search for candidates with the appropriate skills and experience. Using 247’s proprietary job board search engine, the resourcer can identify potential candidates and automatically upload CVs to the Client Path system. Client’s receive a daily status update on their search requests and can export the uploaded CVs via email to parse to their internal candidate database. A variety of reports let both clients and 247Headhunting teams view the volume of new and open requirements and candidate submittals.

“We’ve gone from a paper system to a completely automated system that’s more organized, easier, and very flexible for the client,” said Linda Quinn, Client Services Delivery Director of the UK office. “We have had very positive feedback and have won new business based on superior results in competitive trials.”

### **About 247Headhunting**

Established in 2003, 247headhunting is the premier provider of offshore recruitment, sourcing and screening services — supplying superior candidates 24 hours a day. Advocates of a "best shore" model, we combine the efforts of an onshore and offshore team to provide maximum results for a minimal investment. And, as the most experienced provider in the industry, our clients succeed in the competition for top talent. We employ time-tested processes and cutting edge technology to deliver success, 24/7.
